2017

# SIMPLY PUT, QALIZE IS CLEVER MONEY.

Qalize is the game changer. More than a mobile wallet, Qalize is a fully featured “financial hub” that incorporates mobile payments, rewards and pre-ordering with a cutting-edge POS to offer both customer and merchant a true end to end payment solution.

What makes Qalize different is not only its leading-edge features but the way it dramatically enhances user experience. From the smooth mobile user interface, to the fully featured POS, both customer and merchant know immediately that these are payments that innovate their business.

Qalize breaks boundaries by bringing truly contactless payments to the customer, combining seamless paying at the table in restaurants with iBeacon-based payments in stores and coffee shops. With no need to swipe, tap or scan delete, Qalize shatters the legacy of card based mobile payments. Combine this with personalized cash-back promotions, pre-ordering and real-time bill splitting, Qalize puts the customer at the centre of every transaction.

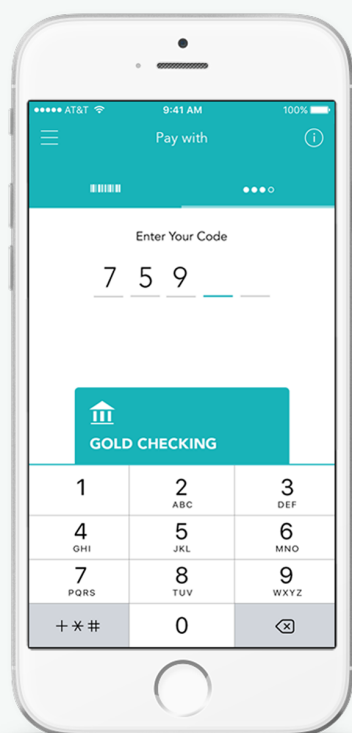

# OPTIMAL WORKFLOW FOR RESTAURANTS.

The key to Qalize is how intuitive it is. In restaurants simply enter the Qalize Code printed at the bottom of every bill to send the entire bill to the app. From there review, tip and pay. Even split the bill right from the app. No more running receipts around. No more waiting. Dine, Qalize Code and Go.

## Smooth Reservation, Pre-Ordering and Delivery Built-In.

By combining table booking with meal pre-ordering, Qalize eliminates the wait and lets the customer get straight to dining. Pre-order and book a table with Qalize and be ready to enjoy your meal when you arrive. By offering this time saving service, restaurants can expect an increase in their sales and table turnover rate. Customers can also order delivery. Qalize has restaurants covered.

# OPTIMAL WORKFLOW FOR SUPERMARKETS.

## Truly Contactless Payments at the Counter.

Nothing could be simpler. Go to the counter, present your purchase and let Qalize do the rest. Through iBeacon technology Qalize will identify the customer and send a detailed bill straight to the app. No need to swipe, tap or scan. Review, touch and go.

## Scan at the Register - Retail and Supermarkets .

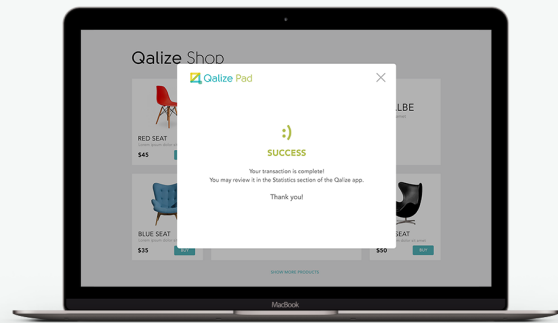

Checkout has never been so smooth. When ready to pay, Qalize generates a unique barcode to identify a specific transaction. The merchant scans the Qalize barcode using their standard scanner. Qalize then identifies the customer based on the barcode and sends a full breakdown of the purchase with a payment request. You are out the door with a single beep.

## Secure Online Checkout.

Fast and smooth online checkout with no credit card, bank account or other sensitive data sent to online retailers. All online purchases are reviewed and confirmed in the app. With an open API/SDK, Qalze payments can be integrated into any online store.

# QALIZE. GETTING IT RIGHT FOR MERCHANTS.

## Qalze POS Solutions. Know your customer. Reward your customer.

Qalze is the self-sustainable and open POS that is ideal for any setup.

Through its cutting-edge proprietary point-of-sale solution, Qalze POS can address the requirements of any restaurant, coffee shop or small to medium store. With real-time personalized promotions for customers, inventory, order and table management, booking and pre-orders, as well as an easy-to-implement SDKs for third-party systems, Qalze POS has got the merchant covered.

Use of the Qalze end-user app with its disruptively low transaction fees and personalized promotions further enhances efficiency and connection with the customer.

# GIFT CARDS AND CASHBACK.

## Getting Gift Cards Right.

Qalize merchants will be able to sell e-gift cards for a fee through the Qalize app, getting paid directly from the purchaser's account. Linking e-gift cards to payments creates a flawless user experience: Qalize automatically redeems the e-gift card as soon as the user makes a purchase from the merchant. Qalize e-gift cards can also be sent to non-users, bringing new customers in the door. Integrations with major third-party gift-card providers are coming soon.

## Qalize Cash Back, Putting Loyalty In The Merchant's Hands.

Qalize merchants may launch and manage cash-back campaigns based on products, timing and audience categories. With access to customer behavior data and breakdowns of purchases, merchants can create personalized loyalty promotions for a better customer relationship.
